

The World Foundation for Natural Science.

The New World Franciscan Scientific Endeavour of The New World Church

Restoring and Healing the World through Responsibility and Commitment in accord with Natural and Divine Law!

INVITATION TO OUR

24th International “New Scientific Outlook” World Congress

FROM

THURSDAY, OCTOBER 31ST 2019, 7:00 P.M. TO SUNDAY, NOVEMBER 3RD 2019, 1:00 P.M.

FOR THE 14TH (FOURTEENTH!!!) TIME ALREADY

AT THE MARITIM HOTEL, BASTEISTRASSE 40, 89073 ULM, DEUTSCHLAND <★> ☎TEL. +49 (731) 9230

Lucerne, September 30th 2019

Dearest friend of our Earth!

Once again it is time for me to invite you to another ‘International “New Scientific Outlook” World Congress from The World Foundation for Natural Science. And so, friends of nature from all over the world, who are ready to stand up for our Mother Earth and turn Her into a more liveable place, will meet in Ulm again this year. This requires courage, enthusiasm, inspiration and often patience, too. For over thirty years now, we have been committed to a life without harmful microwave technology, and now, **at last, people are starting to wake up and take our message seriously.** The planned introduction of 5G is apparently the last straw. “Enough is enough!” That is the tenor we hear everywhere. People recognize the greed that stops at nothing in pursuit of more and more mammon, and now begin to defend themselves against 5G and its effects. We have a lot to say about 5G at this year's congress.

The issue of climate change is similar. There is growing evidence that what appears to be a brave rebellion by a young woman worried about the future of our world is, in fact, a well-planned PR campaign driven by concrete interests. This sixteen-year-old girl uses every platform available to hammer home that we should panic. But it is the very fear that separates us from real life and does not produce any solutions at all, because where there is fear, there is no love. What we love, we do not destroy. It is love that motivates us to protect, change, improve something, not in panic, but **in peace, and by doing our best to serve life.**

“We live in a dangerous age. Man has dominated nature before he has even learned to control himself”, wrote Albert Schweitzer. How true! **In fact, the solutions are ready at hand, and nature shows them to us. That is where we find a bond, a power that includes all life.** Since all life is interconnected, communication with each other is elementary. If this communication no longer takes place, we become lonely and die. This applies to all life down to the smallest living beings like cells, bacteria and viruses. This is the reason why I am writing to you today. We must come together to talk. We want to get to know you better and learn from your experiences. We can only grow and improve individually and as a community by sharing. An individual can never do enough, nor can an individual do

everything. But by connecting like-minded people in spirit, mind and action—we who live on the planet at the same time for the same purpose, which is to learn to live a life in harmony—together we can change what can be changed.

If you read our congress programme carefully, you will realise that we have once again succeeded in getting competent speakers enthusiastic about our cause, who in turn are eager to share their knowledge with you. It is particularly important to us that you take home as many practical solutions as possible and implement them immediately. We are particularly concerned about the topic of plastics, and we can no longer wait and think that it has nothing to do with us, even if we may not live by the sea. **It affects us all.** Plastic can now be found everywhere, in the rain, in the ice caps, in the human body. It is time to act.

Smoking should also disappear from our planet because it causes many deaths every day and is being reinvented with e-cigarettes, and especially the youth are affected severely. We are committed to a smoke-free world and are proud that the Maritim Hotel will be smoke-free during the entire congress and will even remain permanently smoke-free from next year onwards, as soon as the renovation work on the rooms, some of which is still taking place, has been completed. This is also one of our achievements, for which we have fought long and hard. At each of our events we strictly adhere to the *POLICY OF NON-SMOKING*. Smoking of any kind, whether of cigarettes, e-cigarettes, cannabis, or other drugs, is abhorrent and destroys lives; and we, The World Foundation for Natural Science and its members, do what we possibly can to heal and restore life.

John F. Kennedy said: "Those who act while others are still talking are a great step ahead in life." It is up to us to inform ourselves and then to put the knowledge we have acquired into action and to share it with our fellow human beings. **The future depends on what we do today.** With this in mind, we ask you to register for the congress as soon as possible with the enclosed registration card and send it back to us in the return envelope provided. You can also register on our website at

<https://www.naturalscience.org/congress-2019/>

If you prefer to register by telephone, you can reach us by calling our telephone number in Switzerland: +41(41)798-0398. We are there for you during regular office hours (8:00 a.m. to 6:00 p.m.). You should simply know that we have reserved a place for you at this year's 24th International "New Scientific Outlook" World Congress in Ulm. Come, exchange ideas with people from all over the world and find out how much good you can do in this world and for our world. It is worth it, because it is right now that you are laying your foundation for tomorrow. It can be truthfully said that we will not pass the same way twice—so don't hesitate to register.

When you register, you have the opportunity to book your room at the Maritim Hotel in Ulm. As always, the hotel has a certain contingent of rooms available for us at a special "congress price". We therefore recommend that you book your room through us, as this is the only way you can benefit from the special conditions. If you think that you could not come because of your parental obligations, we can reassure you because we offer a special children's programme, for which your help is required. Please let us know in advance if you are bringing your child(ren) and how old they are. We will inform you in good time about

the exact details of the children's programme in a separate letter. We as true Franciscans of course welcome your dog at any time (and so does the hotel!), provided it is house-trained and well-behaved (there is no additional registration fee). Our life would not be the same particularly without dogs as you will find out!

Once again we offer simultaneous translation for attendees speaking German, English, Russian, Spanish and Czech. Whatever language you may speak, it will not be a reason to prevent you from being with us and participating in our World Congress.

It is also a great pleasure for me to draw your attention to a special innovation. We will now have two reserved rooms at the Maritim Hotel for the meal breaks, a larger one with room for about 250 people and a smaller one that is mainly intended for our youthful congress participants. During the congress a buffet will be served there both at lunchtime and in the evening. For a sensational price of only € 100, you can eat comfortably during the whole congress (3x dinner and 3x lunch), and with every meal a bottle of mineral water is included in the price! For those staying at the Maritim Hotel, the rich breakfast buffet (in the restaurant Ulmer Gulden) is still included in the room price. It is planned that during dinner there will be so-called theme-related expert tables, where there will be a unique opportunity to exchange ideas with the various experts and to ask questions. Meanwhile the youth will create their own programme with games and dance. Adults who feel young enough to dance the night away may of course join the youth later to take part in their activities and end the evening with a pleasant get-together!

I am convinced that you will enjoy these new opportunities to be together as never before, as brothers and sisters on Earth and in service to Her. In anticipation of your early registration, I ask you not to hesitate and to contact us if you have any questions, perhaps even on the subject of car pooling or if you need a lift to come to Ulm. We are here to serve you.

Wishing you a safe and pleasant journey to Ulm, Germany, I look forward to welcoming you in Ulm on Thursday, October 31st 2019!
